1. Executive Summary

What We Do.

‘TrustyHands’ is a mobile application which will host the contact details of local tradesmen and service providers. Our app will be crucial in helping its users identify the appropriate tradesmen for their task. They are filtered out as Technical Services and Creative & Personal Services.

Technical Services can include Plumbing, Electrical/Mechanical Services, Carpentry, Roofing, Air Conditioning Services, Cleaning, and Janitorial Services.

Creative & Personal Services can include Pastry Services, Catering, Videographic Services, Event Planning and Coordination, Beauty and Hairdressing Services, and Music and Entertainment Services.

Our Users.

The app will have two types of users - Clients and Service Providers.

Clients are the ones in need of a service. They should be creating a Client Account which will contain information such as their name, phone number, and address. This information will be shared with the particular service providers only when a user applies for their services. On the home page, they will get to see all the services available and service providers under those services. Based on the problem they are facing, they will be able to search for the services they are in need. For one service, there will be different service providers available. Therefore, an algorithm will be used by the app to generate a recommended option. It will be generated by considering the closest provider. Moreover, a client can disagree with the recommended option by looking at the profile of the provider. Each provider will have their own ratings and reviews from their past client.

Service Providers are those who offer services to the client. They should create a Service Provider Account. To be a service provider on the application, they should get verified first. To be a verified service provider, they should submit a portfolio of their past works and a copy of their Business Registration Document.

Why We Stand Out.

‘TrustyHands’ is most likely to be successful as it solves common problems in a very easy and simple way. The app will be made very user friendly using diverse Languages (Kreol/ French/ English) and applying for services are just a few clicks away. So, not only does it save our users time, but it also ensures that they are hiring trusted professionals. Moreover, the service providers also benefit from it as their services will be marketed to a much broader audience.

2. Business Description: Trusty Hands

Our business is a digital marketplace app that connects people across Mauritius with reliable local tradespeople and service providers. Whether you need a plumber, electrician, mechanic, custom baker, photographer, or any other expert, our platform brings them to your fingertips in one convenient app. The service is designed for both everyday households and small businesses, providing a one-stop solution to find and hire skilled professionals anywhere in Mauritius. It makes it easy for users to find trusted and rated service providers all across the island on **Trusty Hands**, solving the common problem of how to quickly locate a dependable tradesperson when you need one.

We offer a user-friendly mobile application (available on iOS and Android) that serves as an online marketplace or directory of local service providers. Through this app, clients can browse listings, read profiles and customer reviews, and book appointments all in one place. The platform essentially acts as an online word-of-mouth network, cleverly bringing together those who need a service with those who offer it on **Trusty Hands**. By fostering transparency and convenience, our business aims to streamline the entire process of finding help for home projects, repairs, events, or business needs. The result is a faster, safer way to match demand and supply for skilled services across Mauritius.

What We Offer

Our platform provides a comprehensive suite of features and services that make hiring local professionals simple and secure. Key offerings include:

- **Diverse Service Categories:** We cover a wide range of service providers under one roof. Users can find home improvement and repair experts (plumbers, electricians, carpenters, handymen), automotive services (mechanics), personal and event services (photographers, caterers, custom cake bakers), domestic help (cleaners, babysitters), and more. This broad selection means you can solve multiple needs through the same app, rather than searching separate sources for each service.
- **Verified Profiles & Reviews:** Every tradesperson or service provider on our platform has a detailed profile listing their qualifications, experience, and areas of expertise. We conduct checks to ensure experienced, qualified professionals only are listed on **Trusty Hands**. Users can browse customer reviews and ratings for each provider, giving you confidence in their track record and quality of work. After each job, clients leave feedback, and these honest reviews are visible in the app for all to see. This builds trust and accountability, creating an online reputation system where good work is rewarded.

- **Location-Based Discovery:** To make finding nearby help even easier, our app uses location-based search and geolocation features. Users can discover and hire providers in their vicinity or specify the region of Mauritius they want the service in. For example, if you're in Curepipe and need an electrician, the app will show electricians available in Curepipe or the closest town. You can also apply filters like pricing, availability, specialty, or customer ratings to pinpoint the perfect match for your needs. This location-aware approach ensures speed and convenience, as you get the nearest available help, which is especially useful for urgent needs or remote areas.
- **In-App Communication & Support:** Communication between customers and service providers is streamlined through the platform. You can chat with providers or discuss details within the app, avoiding back-and-forth phone calls. Our customer support team is also available online to assist with any questions or issues that arise, ensuring a reliable experience from start to finish. The platform's goal is to centralize everything you need searching, booking, messaging, and payment into one easy-to-use application, so you don't have to juggle multiple websites or phone numbers to get a task done.

By combining all these features, our offering stands out as a first-of-its-kind solution in the Mauritian market. It provides both the supply side (local tradespeople and small businesses) and the demand side (households and companies seeking services) a common platform to interact, transact, and grow together.

Why It Matters in the Mauritian Context

Our platform is not just a business venture – it's a solution tailored to address local challenges and unlock new opportunities in Mauritius. Here's why this app can make a significant positive impact in the Mauritian context:

- **Boosting Local Employment:** By making it easier to connect skilled workers with those who need their services, we help generate more job opportunities for Mauritians. The app acts as a job creator and matcher, filling gaps in the market where demand for reliable services exists. Young professionals or tradespeople can find gigs more frequently, and good work leads to positive reviews, which in turn attracts more customers. This virtuous cycle can improve income stability for many freelancers and tradespersons, effectively boosting employment and livelihoods at the grassroots level. When homeowners and businesses have a go-to place to request services, a lot of currently untapped or informal work can turn into real jobs. In short, our platform empowers individuals to earn a living through their skills by connecting them with a wider customer base than they could reach on their own.

- Reducing Informal Labor Gaps:** In Mauritius, a large portion of the workforce is involved in informal or under-the-radar jobs in fact, over half of total employment is informal as of recent years. Many electricians, plumbers, handymen, and other service providers operate on word-of-mouth and cash transactions, without any formal framework. Our platform helps bring these skilled workers into the fold of a structured digital marketplace. This means even one-person businesses or part-time tradesmen can gain visibility and credibility online. By allowing providers to create official profiles, advertise their skills, and accumulate ratings, we help formalize their work and bridge the gap between the informal and formal economy. In the long run, this contributes to better job recognition, fairer pricing, and potentially access to micro-entrepreneur support for these individuals. It also gives customers more assurance, since the platform's verification and review system holds providers accountable to professional standards on **Trusty Hands**.
- Increasing Service Accessibility in Remote Areas:** Mauritius may be a relatively small island nation, but services are not evenly distributed. People living in remote villages or less urbanized regions often struggle to find specialized services nearby, leading to delays or higher costs to bring someone from afar. Our app greatly improves service accessibility across all regions of Mauritius, ensuring that even those outside the major towns can easily find help. As long as you have a smartphone and internet connection and with nearly 88.6% of Mauritian households owning a smartphone now, you can request services from anywhere. The platform's location-based features mean that a family in the south or a business in the far north can connect with the closest available provider or even bring someone from another region if needed. This not only benefits consumers in remote areas by giving them choices, but also benefits providers who are based in those areas by connecting them to island-wide demand. By breaking geographic barriers, the app promotes more balanced service delivery and convenience nationwide.
- Supporting Small Businesses and the Local Economy:** Many of the service providers on our platform are small businesses or independent artisans for example, a self-employed electrician, a family-run plumbing company, a home-based baker, or a freelance photographer. By joining our platform, these entrepreneurs gain wider reach without heavy marketing costs. The app sends them qualified leads and job requests from all over the country, which is perfect for new and developing businesses looking to grow. They can build an online reputation through customer reviews and showcase their work portfolio, helping them attract even more clients over time. This supports small businesses in scaling up and formalizing their client base. Moreover, our platform keeps the flow of money local – when a user in Port Louis hires a handyman from Curepipe, the earnings stay in the local economy. By facilitating thousands of these local transactions, we stimulate the Mauritian economy at the micro level, injecting more business into communities and encouraging

entrepreneurship. The convenience of digital payments also means small businesses get paid faster and can manage their finances more efficiently, aligning with Mauritius's push towards a modern, cash-light economy. In summary, the platform serves as an ecosystem that nurtures small enterprises, drives local commerce, and helps maintain economic resilience within Mauritius.

In **conclusion**, our service platform brings a much-needed innovation to Mauritius by leveraging technology to connect people and services in an efficient, trustworthy manner. It addresses everyday challenges finding the right person for the job while also delivering broader social and economic benefits. By embracing this app, Mauritians can save time and hassle in securing services, and at the same time, uplift their fellow citizens by creating opportunities for work and business growth. This combination of convenience and community impact is what makes our business truly matter in the Mauritian context, and why we are excited to introduce this unique platform to the island.

3. Market Analysis

Market Analysis Summary

TrustyHands is a local marketplace application, which is used to connect consumers with service providers that are in the area such as plumbers, electricians, mechanics, bakers, and photographers. This is because the market in Mauritius is quite conducive to TrustyHands because of the good digital infrastructure in the country, the government support of digital industries, and the growing use of mobile platforms by consumers. Mauritius has a high mobile phone penetration of over 88.6% and internet penetration of more than 80% meaning that Mauritius is suitable to a digital market with innovative service solutions.

Market Segmentation

By Customer Type

Consumer Segment

- Customers who need repairs and maintenance on their homes.
- Young children and families that require such services as plumbing and electrical repair.
- Customers who organize the events (photographers, custom cake makers, decorators)
- Car owners who need mechanical services.
- Medium to High comfort level in technology.

Business Owner Segment

- Individual entrepreneurs and small autonomous service (plumbers, electricians, mechanics) providers.
- Craftsmen and other professionals who are creative (photographers, cake designers)
- Small maintenance and repair companies.
- Home-based businesses
- Technology adoption: low to Medium (must be user-friendly in terms of onboarding)

By Service Category

Essential/Urgent Services

- Plumbing repairs
- Electrical work
- Appliance repair
- Vehicle maintenance

Planned/Discretionary Services

- Photography (event, portrait)
- Custom cakes and catering
- Home renovation and construction.
- Pest control and cleaning

Geographic Segmentation

- Port Louis and the cities around it.
- Secondary cities (Curepipe, Vacoas, Quatre Bornes)
- Semi urban (Phoenix, Ebene)
- Rural regions

Target Audience

- Primary Users (Service Seekers)
- Age 18+
- The city and suburban population.
- Household income: Middle- middle- upper-middle.
- Smartphone: 88.6% of the population.

Characteristics:

- Professionals that are time constrained.
- Quality and reliability oriented.
- Convenience value is sensitive, yet price insensitive.

Service Providers

Target Tradespeople:

- Certified electrical, plumbers, and mechanics.
- Construction contractors
- Home service professionals
- Artists of the service (photographers, bakers, etc.)
- New online entrepreneurs.

Business Profile:

- Small businesses (1-10 employees)
- Seeking channels for acquisition of customers.
- Limited marketing budgets
- Professional credibility requirements.

Market Needs

Consumer Pain Points:

- Service Discovery: Challenge of locating credible, verified vendors.
- Quality Assurance: Requirement of a reviews and ratings system.
- Pricing Transparency: Ambiguous pricing.
- Time Saving: Lengthy booking.
- Trust and Safety: Professional credentials.

Problems with Service Providers:

- Customer Acquisition: Low marketing coverage and budget.
- Business Management: The necessity of online tools and payment systems.
- Professional Credibility: Earning the confidence of new customers.
- Pricing Competition: The balance between Competitive and profitability.

Industry Analysis

The maintenance, repair and professional services under the service sector in Mauritius make up an important segment of the economy. The business of service providers is significant yet in most cases disorganised with thousands of tradesmen working throughout the island. An increase of 24.13% in digital commerce means that customers are at ease with online shopping and online payments. The government is also concerned with the development of small and medium enterprises (SMEs), which is in line with the ecosystem that TrustyHands aims at.

Competition Analysis

Direct Competitors:

1. Travay La Fer

Market Position: Local services marketplace established.

Strengths: First-mover, local brand awareness.

- Weaknesses: Poor functionality of the app, lacking user interfaces.
- User Review: Both negative and positive reviews, complaints of technical problems.

2. StarOfService

- Coverage: Port Louis and surrounding areas
- Services Offered: Plumbing, electrical, and construction services
- Model: Directory-style listings

Indirect Competitors

Traditional Channels:

- Yellow Pages Mauritius
- Facebook business page and groups.
- WhatsApp referrals
- Word-of-mouth networks

Emerging Digital Platforms:

- The MauritiusDirectory.mu (AI-enhanced directory) is used to identify the top 50 companies.
- Different service-based applications and websites.

TrustyHands has competitive Advantages.

- Advanced Technology: Advanced application design and experience.
 - Business Model Innovation: Subscription and digital advertising income.
 - Quality Focus: Improved vetting and rating.
 - Marketing Approach: Pro-digital marketing strategy.
-

5. Implementation of Business

a. Implementation Plan: Key Steps to Get Started (First-Year Roadmap)

Let's be honest: launching an app isn't something you do overnight. We're looking at about a year to get everything up and running properly for about a year. The idea is simple: create an app that helps everyday Mauritians find reliable plumbers, electricians, photographers, and other skilled professionals they can trust.

Phase 1: Research and Planning (Months 1–2)

Before we build anything, we need to understand the lay of the land. How do local tradesmen currently get their name out there? What frustrates them? And when someone's toilet is flooding at 10 PM, how do they find help?

We'll chat with people across Port Louis, Quatre Bornes, and Curepipe—conducting surveys, having real conversations, maybe even sitting down for coffee with a few electricians and homeowners. By the end of this phase, we'll know exactly what needs to be in the app, how much to charge, and how to make it useful for Mauritians.

Phase 2: App Development (Months 3–6)

This is where magic happens. We'll bring in a development team, which could be local talent, or we might outsource part of it to build what's called an MVP (Minimum Viable Product). This is a fancy term for "the simplest version that actually works."

What's going in? The essentials: local business listings, a search tool that works by location, ratings and reviews (because trust matters), a chat feature so people can ask questions, and proper categories for different services. We'll also start signing up local service providers who want to be part of this from day one. And since everyone's glued to their phones here, it'll be mobile-first all the way.

Phase 3: Beta Testing and Refinement (Months 7–8)

Time to let some actual users kick the tires. We'll roll out the app to a small group of Mauritians both customers and businesses and watch how they use it. Where do they get stuck? What works well? What doesn't make sense?

This is also when we'll make sure the app speaks to everyone, potentially adding Creole alongside English. The goal here is simple: make sure people feel comfortable using it and that it solves their problems. Early trust is everything.

Phase 4: Official Launch (Months 9–10)

App stores, here we come! We'll launch on both Google Play and the Apple App Store with a proper campaign behind it. Social media will be buzzing; we'll run some targeted online ads and hopefully get people talking about it.

We're also planning to team up with organizations like SME Mauritius and the National Women Entrepreneur Council to bring in verified, credible businesses. The target? Get our first 1,000 users through the door and start building momentum.

Phase 5: Growth and Monetisation (Months 11–12)

By now, the app should be up and running smoothly. This is when we start introducing subscription plans for businesses who want extra visibility and premium features. We'll also plug in Google AdMob for some ad revenue.

But it's not just about the money we'll be watching how people use the app, what they love, what they ignore, and what new features they're asking for. By the time we hit the one-year mark, we want a platform that's making money and has happy users who keep coming back.

b. Costs: Initial Setup and Ongoing Expenses

Let's talk about numbers. Everything here is in Mauritian Rupees, based on what things cost right now.

Initial Setup Costs

Building an app isn't cheap, but it doesn't have to break the bank either. Here's the breakdown:

- **App Development:** Between MUR 550,000, depending on how fancy we go and who we hire
- **Branding and Design:** Around MUR 75,000 for a logo, marketing materials, and making everything look professional
- **Legal Stuff:** About MUR 25,000 for company registration, privacy policies, and getting all the paperwork sorted
- **Launch Marketing:** We're looking at MUR 100,000 to spread the word – social media campaigns, maybe some influencer partnerships, flyers, the works

Total to get started: MUR 750,000

It's a decent chunk of change but remember this is building something from scratch.

Ongoing Yearly Expenses

Once we're live, here's what we'll be spending each year:

- **Hosting and Tech Maintenance:** MUR 122,500 to keep the servers running smoothly
- **Customer Support:** MUR 265,000 for someone to handle questions and issues
- **Ongoing Marketing:** MUR 110,000 to keep attracting new users and businesses
- **Other Bits and Pieces:** MUR 15,000 for small operational costs here and there

Yearly total: **MUR 512,500**

c. Marketing Strategy (Mauritian Market Focus)

Look, you can build the best app in the world, but if nobody knows about it, you've got nothing. Marketing is where the rubber meets the road, especially in a tight-knit place like Mauritius where word of mouth is king.

1. Digital Marketing

Mauritians love their Facebook and Instagram that's just a fact. We'll be all over these platforms with sponsored posts, real stories from local tradesmen who've benefited from the app, and content that resonates with people.

Google Ads will target searches like "electrician near me" (or "elektrisien kot mwa" if we're getting local about it). And TikTok? Perfect for short, authentic videos showing real Mauritian service providers doing their thing and growing their business through the app.

2. Partnerships

We're not doing this alone. Partnerships are crucial. We'll work with SME Mauritius, local councils, vocational training centres, and chambers of commerce to bring credible, verified tradesmen onto the platform.

The "Made in Moris" initiative is another natural fit, it's all about supporting local, which is exactly what we're doing. And to sweeten the deal for early adopters? Free three-month trial before any paid plans kick in.

3. Community and Word-of-Mouth

You know how it works here, you trust your cousin's recommendation more than any ad. We're building on that with a referral program where users get credits or discounts for bringing their friends on board.

Reviews and ratings will be front and centre because people need to see that others have had good experiences. And we'll show up at events like Salon de la PME to meet people face-to-face and build that trust in person.

4. PR and Branding

We want to position this as *the* go-to platform when Mauritians need to find reliable local services. We'll work with media outlets like Defi Media, L'Express.mu, and Radio Plus to share our story.

The branding will hammer home three things: trust, convenience, and empowering small Mauritian businesses. Real success stories from local entrepreneurs will be everywhere because nothing builds confidence like seeing someone just like you winning with the platform.

How Money Works

Revenue will mainly come from business subscriptions we're thinking of around MUR 500 to 1,000 per month. Businesses get better visibility, premium features, and more customers. For them, it's a marketing expense, which potentially makes it tax-deductible too.

We'll also earn from Google AdMob ads and premium placements (like featured listings at the top of search results). Multiple revenue streams mean we're not putting all our eggs in one basket.

Conclusion

The first year is all about building something that works for Mauritians. Not some generic app that's been copied and pasted from somewhere else, something designed specifically for how things work here.

By combining smart design, the right partnerships, and marketing that speaks to local values, we're aiming to create a platform that genuinely helps both everyday people and hardworking service providers. Something that makes life a bit easier and helps small businesses thrive.

That's the goal. That's the plan. Now let's make it happen.

6. MANAGEMENT TEAM

Our business will be under management by six members who are hardworking, and goal driven.

The names of these members are as follows:

1. Emilio Iyempermall (2516086)
2. Allybocus Zarif Ally (2515492)
3. Muneesh Seemeeram Misser (2516742)
4. Hussain Ali Kabir (2510788)
5. Doorandharsingh Dookhy (2515500)
6. Wisdom Siandongwe (2510198)

The roles of project are as follows:

1. Chief Executive Officer (CEO)
2. Chief Operating Officer (COO)
3. Chief Financial Officer (CFO)
4. Chief Technology Officer (CTO)
5. Head Of Marketing
6. Head Of People

CHIEF EXECUTIVE OFFICER (CEO)

At the top of our business, we have our CEO. As the founder of Trustyhands, this role was assigned to Emilio Iyempermall. His major task will be to set goals and have a vision for the business in years to come. He will also make the final decision on whether a new idea will be launched or will not be launched to the audience. He will also be the voice of the company to investors. The formation of partnerships with clients and other businesses will be up to the CEO.

We chose Emilio Iyempermall for this role mostly because of his superb communication and presentation skills, which will come in handy during meetings with investors. He was also given this role because of his critical and strategic thinking. Even when under pressure, he always manages to keep his composure and think rationally. We also chose him because of his good team-building skills.

Why this role matters: gives the business a goal to achieve, responsible for growth and success of the application.

CHIEF OPERATING OFFICER (COO)

This role was assigned to Allybocus Zarif Ally. He will be responsible for turning the CEO's vision into reality. He will design workflows and internal systems of the business. He will also look over all the operations in the business to ensure that it runs smoothly and efficiently. He will also be responsible for creating schedules of when new features for the app will be published. In addition, he will be the one who ensures that the application meets the legal and privacy standards set by the law.

We chose Allybocus Zarif Ally for this role because of his strong thinking and pattern solving skills. He also has good interpersonal skills.

Why this role matters: improve quality of the app, ensures smooth day-day operation of the app.

CHIEF FINANCIAL OFFICER (CFO)

This role was assigned to Muneesh Seemeeram Misser. He will be the one responsible for taking care of the business's financial health. He will develop financial strategies for the business and create set budgets. He will be the one who writes financial reports which will be used in meetings with investors. He will also find better ways of spending money by negotiating with clients and partners. He will also be the one to find revenue opportunities and build scalable financial systems.

We chose Muneesh Seemeeram Misser for this role because of his strong mathematical and negotiation skills.

Why this role matters: ensures sustainability of the business, growth of business.

CHIEF TECHNOLOGY OFFICER

This is one of the most important roles for our business. The role was assigned to Hussain Ali Kabir. He will be responsible for recruiting developers and engineers for the application. He will be the main driver of innovation within the business. He will ensure that the application is properly optimized, scalable and that it meets the needs of the users. He will also ensure that the app is able to adapt to new technologies as it grows.

We chose Hussain Ali Kabir for this role because of his deep understanding of technology. He also has good team building skills which are needed to recruit members like engineers for the application.

Why this role matters: building of the app's core functionality and security of the app.

HEAD OF MARKETING

This role was assigned to Doorandharsingh Dookhy. The growth of the business will be almost fully dependent on him. He will be the one setting launch dates for features of the app on key dates so that it reaches a much broader audience. He will be responsible for advertising the application through programs like Google Ads and many more. He will form partnerships with online agents to reach even bigger audiences. He will figure out the most effective channels to reach potential customers. He will also keep track of conversion rates for the app to pin-point where the app needs to be improved on.

We chose Doorandharsingh Dookhy for this role because of his strategic thinking skills. We also chose him because of his strong online presence, which will boost the business quickly.

Why this role matters: growth of the application. Gives the business its unique identity to customers.

HEAD OF PEOPLE

This role is held by Wisdom Siandongwe. Think of him as the heart of our operation—the person who keeps everyone on our team, both internal and external, feeling connected, supported, and motivated. He is the bridge that ensures smooth communication and a positive, productive vibe across the entire company. He is the one who listens, empowers the team, and helps resolve any hiccups along the way. His real talent lies in bringing people together to foster a culture of respect and collaboration, which is the true foundation of our company.

We chose him for this role because he doesn't just manage relationships—he builds them. His empathy and conflict-resolution skills ensure our work environment remains healthy and focused, no matter where our team members are located. He is essential for keeping our company culture strong and our network united.

Why this role matters: Shapes team dynamics and ensures maximum productivity.

6. Financial Projections

The finances of **TrustyHands** are quite straightforward.

Since the business runs entirely online, there's no need for physical office or full-time employees.

The few people required for customer support will be outsourced to larger firms, which will help keep our running costs very low.

To make sure our projections stay realistic, we made a few key assumptions:

1. **Corporate tax rate:** 15%
2. **Conservative estimates:** We increased our expected costs by 10% and reduced our expected income by 10%. This gives us a clearer view of how the business would perform even in a worst-case scenario.

Below is a summary of our **start-up costs**:

TOTAL ESTIMATED STARTUP COST

Category	Total (MUR)
App Development & Technical Setup	550,000
Marketing & Branding	100,000
Administrative & Legal	25,000
Equipment & Miscellaneous	75,000
<u>GRAND TOTAL</u>	<u>≈ MUR 750,000</u>

A detailed breakdown of our Start-Up Cost:

Start Up Cost (Pre Launch / Year 0)

Category	Item	Description	Estimated Cost (MUR)
1. App Development and Technical Setup	App Development (Android & IOS)	Design, coding, backend setup, and testing outsourced from Local Agencies	500,000
	Backend & API Development	Server Hosting and Database Setup	30000
	App Store Registration	Apple Developer Account (MUR 4,000/yr) + Google Play (MUR 1,000).	5000
	Testing and Debugging	Hiring App Testers & Cost of Software and Licences	15000
	Subtotal (Technical)		550,000
2. Marketing & Branding	Brand Design	Logo, color palette, visual identity, app icon.	15,000
	Pre-launch Campaign	Ads, social media promotion, influencer marketing.	65,000
	Promotional Content	Photography, videos, app demo materials.	20,000
	Subtotal (Marketing)		100,000
3. Administrative & Legal	Business Registration	Registrar of Companies + licenses.	5,000
	Legal Documentation	Contracts, privacy policy, terms of use.	10,000
	Accounting & Bank Setup	Business account, accounting setup fees.	10,000
	Subtotal (Admin)		25,000
4. Equipment & Miscellaneous	Equipment	Laptops, peripherals, software licenses.	25,000
	Contingency	Unexpected costs buffer.	50,000
	Subtotal (Misc.)		75,000

Our business strategy is to **invest heavily in marketing**.

We believe that if we can reach business owners directly and show them how TrustyHands works on their own screens, it will make a strong impression and help us grow quickly.

"Market Smarter, Pay Less: The Tax-Effective Alternative. We don't just provide a service; we offer a smart financial decision. TrustyHands membership is a recognized marketing and business development expense. This means that our subscribers can deduct the entire cost from their taxable income, reducing the actual cost of customer acquisition.

Yearly Expenses

Given the nature of our business, we will have recurring costs each year.

We've also assumed that our running costs will increase by 15% annually to account for growth and inflation.

Below is an overview of our estimated expenses for Year 1.

As you'll notice, we've allocated a significant portion of our budget, as it remains a key part of our growth strategy.

Year 1 Expenses

Category	Item	Description	Estimated Cost (MUR)
1.Staff/Outsourced Services	Customer Support	Outsourced or freelance VA / call center	200,000
	Accounting / Bookkeeping	Part-time accountant or outsourced service	50000
	Legal / Compliance Retainer	Contract review, minor legal support	15000
	Subtotal (Staff)		265,000
2. Hosting & App Maintenance	Cloud Hosting & Database	Year 1 Cost Estimate with Low amount of Users	75000
	Domain & Website Hosting	Domain + website hosting for marketing site.	7500
	App Maintenance & Support	Minor updates, patches, and support after launch.	40000
	Subtotal (Hosting)		122,500
3. Marketing	Social Media Ads	Facebook, Instagram, Google Ads	75,000
	Content & Design	Graphics, videos, app demo materials	10000
	Influencers/ Sponsorship	Sponsoring Local Digital Creators/Events to promote the app	50000
	Subtotal (Marketing)		135,000
4. Miscellaneous	Small Expenses	Unexpected costs, subscriptions, small office expenses	15000
	Subtotal (Miscellaneous)		15,000

Total Year 1 Expenses (excluding taxes)

Category	Estimate (MUR)
Staff / Outsourced	265000
Hosting & App Maintenance	122500
Marketing & Customer Acquisition	135000
Miscellaneous / Contingency	15000
Total Year 1 Operating Expenses	537500

Year 2 - 5 Expenses will be recurring, with a estimated liberal expense growth of 15% each year

As you may have noticed, **we have not included any personal salaries** for the founders. This is because we will be **compensated with dividends** from the company's profits. The business model is designed so that, once established, it can **operate efficiently in the background**, requiring only minimal involvement from us mainly for **marketing and strategic oversight**.

Profitability

Speaking of the company profits, *when* does TrustyHands break even?

From our analytics, we believe that we will be able to achieve the following amount of consumer base:

Year	Paying Businesses	App Users
1	50	1,000
2	125	2,000
3	275	5,000
4	400	10,000
5	500	15,000

Following these projections, we've prepared a detailed **financial analysis covering Years 1 to 5**.

This section outlines our expected **revenue growth, expenses, and net profitability** over time, illustrating how TrustyHands is set to scale sustainably once the initial setup and marketing phases are complete.

CPM @Rs100 per thousand with around 120 ads per year

Expenses growing at 15% each year

Year	Subscription Revenue (MUR)	Ad Revenue (MUR)	Gross Revenue (MUR)	Total Expenses (MUR)	Yearly Income Before Tax (MUR)	Yearly Tax	Yearly Profit
1	300,000	12,000	312,000	537,500	-225,500	0	-225,500
2	750,000	24,000	774,000	618,125	155,875	0	155,875
3	1,650,000	60,000	1,710,000	710,844	999,156	26,930	972,227
4	2,400,000	120,000	2,520,000	817,470	1,702,530	255,379	1,447,150
5	3,000,000	180,000	3,180,000	940,091	2,239,909	335,986	1,903,923

With Initial Investment of MUR750k included for 1st year

Cumulative Profit (Pre Tax)	
-975,500	
-819,625	
179,531	- Break Even Point
1,882,061	
4,121,970	

- Financial Estimation for the first 5 years of Trusty Hands

Graphical Representation:

TrustyHand is set to break even near the end of year 3, even under a worst-case scenario! Ultimately, our financial projections demonstrate a prudent and achievable path to profitability for TrustyHands.

The initial capital investment covers development and launch, after which the business runs on a low annual budget, focusing heavily on marketing and app maintenance. This disciplined approach towards costs, combined with our scalable platform, will confidently allow the project to reach a break-even point within the first three years.

Subsequently, the model projects rapid acceleration in profitability as revenue growth significantly exceeds modest growth in operating expenses.

By Year 5, TrustyHands is projected to become a highly profitable enterprise, strengthening its position as both a vital service to Mauritius and a sustainable, long-term business.

Dynamic and visionary leader with a strong entrepreneurial mindset and a proven ability to plan, lead, and execute digital business ventures. As Chief Executive Officer of TrustyHands, a Mauritius-based digital marketplace app, I have led strategic planning, app implementation, and business development from concept to launch. Recognised for excellent communication, strategic decision-making, and team leadership, I thrive on creating innovative solutions that support small businesses, empower local professionals, and deliver value to customers.

Professional Experience

Chief Executive Officer

TrustyHands, Reduit, Moka | January 2024 - Present

- Led the conceptualisation and strategic development of TrustyHands, a digital marketplace connecting Mauritians with trusted local tradespeople and service providers.
- Directed the one-year implementation roadmap, from research and app development to beta testing, launch, and monetisation.
- Oversaw collaboration with developers, marketing specialists, and partners to ensure smooth rollout of the mobile application.
- Designed and implemented marketing strategies tailored to the Mauritian market, including digital campaigns, community partnerships, and PR initiatives.
- Forged key partnerships with local organisations such as SME Mauritius and the National Women Entrepreneur Council to onboard verified providers.
- Managed the financial planning of the business including startup cost estimation, ongoing expenses, and early-stage revenue models.
- Represented the company in meetings with investors and stakeholders, presenting growth projections and strategic goals.
- Promoted an organisational culture based on trust, innovation, and collaboration.

Achievements:

- Built and led a 6-member management team with clear operational, financial, and marketing responsibilities.
- Developed a business model projected to break even by Year 3 under conservative financial forecasts.
- Delivered a locally relevant app concept designed to formalise informal labour and boost local employment across Mauritius.
- Positioned TrustyHands as a community-driven, tech-forward brand that promotes digital inclusion and supports Mauritian entrepreneurs.

Education

Bachelor of Science (BSc) in Management

University of Mauritius, Reduit, Moka | July 2018 - July 2021

Graduated with a Bachelor of Science in Business Management from University of Mauritius, where I developed a strong foundation in various business disciplines such as marketing, finance, and organizational behavior. Courses like Strategic Management and Business Ethics provided me with a deep understanding of core business principles and their application in real-world settings.

Master of Science (MSc) in Management

University of London, London, UK | July 2022 - July 2024

Graduated with a Bachelor's degree in Management from a reputable university, obtaining a solid foundation in business principles, organizational behavior, and leadership skills. Completed coursework in strategic planning, project management, and human resources management, gaining a comprehensive understanding of business operations and management practices.

Finance professional with experience as CFO at *TrustyHands*, managing budgets, strategy, and digital revenue systems for a tech startup. Currently pursuing a BSc in Financial Technology to deepen expertise in data-driven finance and digital innovation. Skilled in financial planning, cost optimisation, and analytical problem-solving. My goal is to build a career at the intersection of finance and technology, driving smarter, scalable financial solutions.

Professional Experience

January 2024 - Present	Chief Financial Officer <i>PixelBuilders (TrustyHands), Reduit, Moka</i> As Chief Financial Officer of TrustyHands, I oversee the financial planning and strategic growth of a digital platform connecting Mauritians with verified service providers. I am responsible for managing budgets, preparing investor-ready financial reports, and identifying sustainable revenue models. My role involves creating financial systems that support the company's expansion while maintaining cost efficiency and profitability. I also lead negotiations with partners, oversee expense control, and ensure that every financial decision aligns with long-term business goals. With a strong background in mathematics and analytical thinking, I bring structure, foresight, and precision to every project — driving <i>TrustyHands</i> toward financial stability and measurable success.
------------------------	--

Education

July 2020 - July 2023	Bachelor of Science (BSc) in Financial Technology <i>University of Mauritius, Reduit, Moka</i> I'm particularly passionate about how technology is reshaping finance. Through my experience managing digital platforms, I've developed a growing focus on FinTech innovation, from digital payment ecosystems to scalable financial solutions that empower small businesses.

Linkden: <https://mu.linkedin.com/in/ali-kabir-hussain-a1b9a9339>

Highly accomplished Chief Technical Officer (CTO) with several years of experience in leading technology teams and driving strategic initiatives. Adept at developing and executing innovative technical solutions that align with business goals and drive growth. Skilled in overseeing the development of cutting-edge products, managing complex technical projects, and implementing best practices to optimize performance and efficiency. Proven track record of success in digital transformation, cloud computing, cybersecurity, and emerging technologies. An effective leader with strong communication skills and a passion for driving organizational success through technology innovation.

Professional Experience

Chief Technical Officer

TrustyHands, Reduit, Moka | January 2024 - Present

- Led end-to-end development and strategic roadmap of TrustyHands, from concept to launch and monetisation.
- Directed cross-functional teams (development, marketing, partnerships) to deliver a high-performing mobile platform.
- Oversaw app architecture, feature planning, and beta testing to ensure reliability and scalability.
- Built partnerships with SME Mauritius and NWECC to onboard verified service providers.
- Managed product budget, technical operations, and early-stage revenue strategies.
- Represented the company in investor meetings, presenting growth forecasts and technical vision.
- Cultivated a culture of innovation, collaboration, and trust across the tech and business teams.

Education

BSc (Hons) Computer Science in Data Analytics

University of Mauritius, Reduit, Moka | July 2021 - July 2024

- Developed a strong foundation in statistical analysis and mathematical modeling through coursework in probability theory, linear algebra, and calculus. Applied these theoretical concepts in real-world scenarios to enhance data analysis skills, including regression analysis, time series forecasting, and hypothesis testing.
- Completed projects that involved cleaning and preprocessing raw data, performing exploratory data analysis, and building predictive models to solve business problems. Developed critical thinking and problem-solving skills by working on multidisciplinary teams to address complex data analytics challenges.
